ABM JANITORIAL SERVICES SUMMONS SANITAIRE TO DELIVER TOP-NOTCH CLEANING FOR ARIZONA'S TALLEST BUILDING

(Charlotte, N.C.) – June 27, 2012 – Chase Tower, the tallest building in Arizona, demands professional cleaning services that can scale the structure's 38 stories and more than 700,000 sq. ft. with ease and power – without interrupting tenants' evening work habits. To meet the demands of this prominent client, ABM Janitorial Services, a leading provider of integrated facility solutions nationwide, armed staff with high-filtration, ultra-quiet Sanitaire upright vacuums.

“Chase Tower is a ‘class A’ building and the ultimate busy-office setting,” said Peter Denton, Branch Operations Manager for ABM Janitorial Services, South Central, Inc. “Because of the high density of people in the building and the constant foot traffic, we were challenged to use quiet uprights with superior filtration and no dust kick-up.”

ABM selected Sanitaire vacuums for the job and put multiple Sanitaire models to the task in Chase Tower over the past five years. “Sanitaire vacuums are extremely quiet, high-filtration units and they deliver the premium performance our client needs – right down to the fresh track marks on the carpet that give tenants visual proof that the building just received a deep, thorough clean,” said Denton.

Quiet Cleaning, Superior Filtration

For many ABM clients, best-in-class cleaning performance means quiet vacuums that meet today's high-standards for green cleaning excellence.

“Quiet cleaning tools are important for our clients,” said Denton. “In many of the facilities we clean, tenants are working extended hours and don't want to be disturbed by vacuums. Sanitaire's Quiet Clean line is a great option for our facilities interested in day cleaning schedules – or those that need day cleaning convenience even after the 9-5 work day has ended – like Chase Tower.”

Every vacuum in Sanitaire's Quiet Clean line operates at 69 decibels or below so staff can discretely clean at any hour, with less interruption to office workers.

The Sanitaire Quiet Clean line also helps ABM deliver on its corporate sustainability commitment, which focuses on enhanced indoor air quality at an affordable price. ABM is currently green cleaning more than 300 million square feet of building space nationally. To assist ABM in this venture, all Sanitaire Quiet Clean models carry the CRI “Seal of Approval” and are USGBC LEED compliant.

“We also have a lot of experience cleaning schools and we bring the education industry’s standard for health, filtration and performance to every client and every industry we work in. That’s why we rely on Sanitaire and its wide selection of ‘green cleaning’ vacuums,” said Denton.

The Building Services Solution

ABM provides specialized cleaning solutions for thousands of commercial, industrial, government and retail clients across the U.S. and international cities. A leading facilities services company, ABM has used Sanitaire products since its inception to provide consistent durability, performance and value for its clients.

“Sanitaire vacuums last a long time, which is extremely important to us. I’ve worked closely with models such as the SC688 and it has really become a workhorse for my team. It meets the demands of rigorous, commercial cleaning without sacrificing performance or durability, and we really take our vacuums to the races,” said Denton.

For more than 35 years, Sanitaire has engineered durable tools that allow clients to focus on cleaning – not fixing or, worse, replacing – an essential tool for their business.

“At ABM, we recognize and appreciate the value that Sanitaire vacuums bring to our clients and we will continue to use Sanitaire uprights as our standard of excellence in floor cleaning.”

###

About Sanitaire Commercial Vacuums

Sanitaire has maintained its own manufacturing facility in North America for more than 35 years. This allows the company to own and oversee all phases of the manufacturing process for more than 90 percent of its product line, ensuring the highest quality standards are met consistently. Furthermore, all Sanitaire branded products undergo rigorous testing and quality assurance programs to make certain they are designed and built to last.

A member of the Electrolux Home Care Products family since 1974, Sanitaire has earned the reputation as an industry leader by producing the most durable and serviceable commercial upright vacuums in the industry. The current line of Sanitaire vacuum cleaners includes uprights, canisters, back-packs, floor machines, industrial carpet cleaners, air movers and accessories.
